DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin Spivak on 04/11/2006.

The application has been amended as follows:

In claim 1, change the word "after" in the 3rd line to "each time"

2. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: As per the attached copy of Figure 1, with changes shown in red, labels have been added to better understand the graph. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Allowable Subject Matter

3. Claims 1-4 are allowed.

Art Unit: 2612

4. The following is an examiner's statement of reasons for allowance: Prior art fails to teach or suggest a method for detecting an object in a door opening of a vehicle, wherein a signal deviation from a set point value is used to trigger a vehicle reaction, and further wherein the set point value is updated, or re-established each time a vehicle drives off, after a door is closed. The major difference between applicant's invention and that of US Patent 6,495,933 B2, to Tokuda et al., with respect to claim 1, is that Tokuda does not establish or re-establish a set point or threshold value, but rather upon detection of an object the current of the drive motor, which operates the door, becomes abnormally high, which is detected, and causes the doors to reopen. Upon opening the door, and clearing the obstruction, the drive motor returns to a normal operating current, which is a constant value, and is therefore not updated or re-established, but rather is always the same numeric value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
